

What I enjoy about nature...

### A Spring Morning in Edinboro

I woke up one morning and saw snow, it was supposed to be spring! Well, this IS spring in Edinboro!! So I put on my snow boots and took some pictures. I really love the outdoors because it is a big place to think and explore! I like to have adventures and there are so many things to play. I like to discover new things, watch the animals and love to see the new buds on the trees. Spring is the time of year to garden and I love to garden and plant flowers.
