

## What I enjoy about nature...

I like the outdoors because you can explore! Exploring is fun if you are careful. You can enjoy exploring too, but what I like to enjoy about nature is the animals. I think they are so cute. But I think other things are enjoyable about nature. Like in the spring how the trees and bushes mix and makes a pretty scenery. And in the fall how all the pretty colors on the trees. And in the winter how the snow glistens on the trees. I think it looks so pretty. And there's 1,000,000 other things to enjoy about nature. So go outside and explore and you will find things that you never seen before. So explore the world.
